**PROCEDURE FOR CALCULATING SURCHARGES:**

- For easy calculation of correct surcharge, (a) group and list GF, 10K and 14K items using current price list unit prices and extend in the regular manner, (b) add them together to determine the basic total amount for those items in the gold category, (c) Based on the market price of that day, determine the applicable percentage of surcharge (from the gold surcharge schedule), (d) multiply the basic total amount times that percentage and add it to the order in the amount column.
- (a) Follow the same procedure for sterling silver and vermeil items, (b) use the silver surcharge schedule to determine the percentage.
- All bronze, gold electroplate, rhodium plate, and silver plated categories are exempt from the surcharge schedule, as are all non-jewelry items.
- Market prices of gold and silver may be obtained from your local newspaper, radio, television, bank, commodities broker or by calling our main office after 12 o'clock (noon) Central Standard time at (630) 584-9414.
- Since further fluctuations are likely during the few days your order is in transit, our Order Department will evaluate your order on the basis of the post mark date of your order. Any fluctuations beyond that date will be absorbed mutually in the interest of utilizing the surcharge schedule to arrive at a reasonably equitable solution to the volatility of world material markets.
